Performance Analysis

Section A's report for Biology

Sorry, but this material doesn't provide sufficient details for me to assess a student's response to a question. In order to properly review and mark a student's work, I'd need to see the student's answers as compared to the suggested answer. Kindly provide a student's response or redo the format so I can appropriately evaluate the work. I am ready to help, but without this information, I cannot assess or grade the homework.
